KAAM CONNECT

Find Local Help.
Connect with Skilled Workers.

A local service marketplace built to make finding help easier.

TEAM NAME

The 5th Logic

Finding local help is still fragmented

Customers need a reliable way to discover, compare and track a service request.

01

Hard to find

People rely on calls, messages and word-of-mouth.

02

Unclear details

Charges and availability may not be known upfront.

03

Trust gap

Skills, experience and reviews are hard to compare.

04

No clear status

Request progress can be unclear after first contact.

THE GAP **Customers need help. Skilled workers need customers. Discovery and follow- up are scattered.**

One place for the whole service journey

Reduce the effort between needing a service and getting it done.

TODAY

Call | Message | Ask around

?

Scattered and uncertain

WITH KAAMCONNECT

Search | Compare | Request

Track • Complete • Review

One shared platform helps customers discover workers and helps workers reach more people.

From search to service — in five clear steps

A simple customer experience with visible booking status.

01

SEARCH

Choose a service and area

02

COMPARE

View skills, charges and availability

03

REQUEST

Send a service request

04

GET SERVICE

Worker accepts and completes the job

05

REVIEW

Rate the service after completion

PENDING → ACCEPTED → IN PROCESS → COMPLETED

Clear booking states

A request moves through a clear system

Frontend → Spring Boot REST API → MySQL → worker response.

Booking status returns to the customer

DATA STORED Users • Worker profiles • Services • Bookings • Reviews

A simple, practical technology stack

Built with familiar web technologies and a Java backend.

01

HTML + CSS + JavaScript

FRONTEND

Responsive pages, forms, search and user screens

02

JAVA + SPRING BOOT

BACKEND

REST APIs and application business logic

03

MYSQL

DATABASE

Users, worker profiles, bookings and reviews

FRONTEND → SPRING BOOT REST API → MYSQL DATABASE

Designed for both sides of local services

KaamConnect supports customers and service workers through one platform.

CUSTOMERS

Find local help

Search workers and compare skills, details and availability.

SERVICE WORKERS

Reach more customers

Create a profile and manage incoming service requests.

TRUST & TRACKING

Know what happens next

Track booking status and share feedback after service.

PILOT IDEA

Start in one locality with 5– 10 service providers; improve through user feedback.

Start local. Build trust. Improve with feedback.

Validate the idea with a focused first version before expanding.

NOW

Core platform

Search • profiles • requests
booking status • reviews

PILOT

Local validation

Onboard 5–10 workers
run supervised bookings

NEXT

Future scope

Location matching • notifications
chat • payments • analytics

THANK YOU

KaamConnect — Find Local Help. Connect with Skilled Workers.
